**330-427-8087 (plant)**

If you feel your bill is too high or too low please call the office to have it checked right away. Sometimes you get a bill that is low and think wow I just got a break on my water bill then the next month you get a real high bill. Most of the time it is an error made by either myself or a meter reader. Maybe it is a leak that you're not aware of and the water department is the first to know. You can save a lot of money by getting a plumber to fix the leak when it is first discovered than to wait a month and then start checking. I would like to thank the residents for helping me to do a better job. Don't ever worry about bothering the water Department with your questions or comments that is what we are here for.
